Midsize businesses

Companies with 200-5,000 employees

IT consulting

Business automation

IT outsourcing

Small and midsize digital businesses

Ecommerce, professional services, financial services, XaaS companies, etc.

Digital consulting

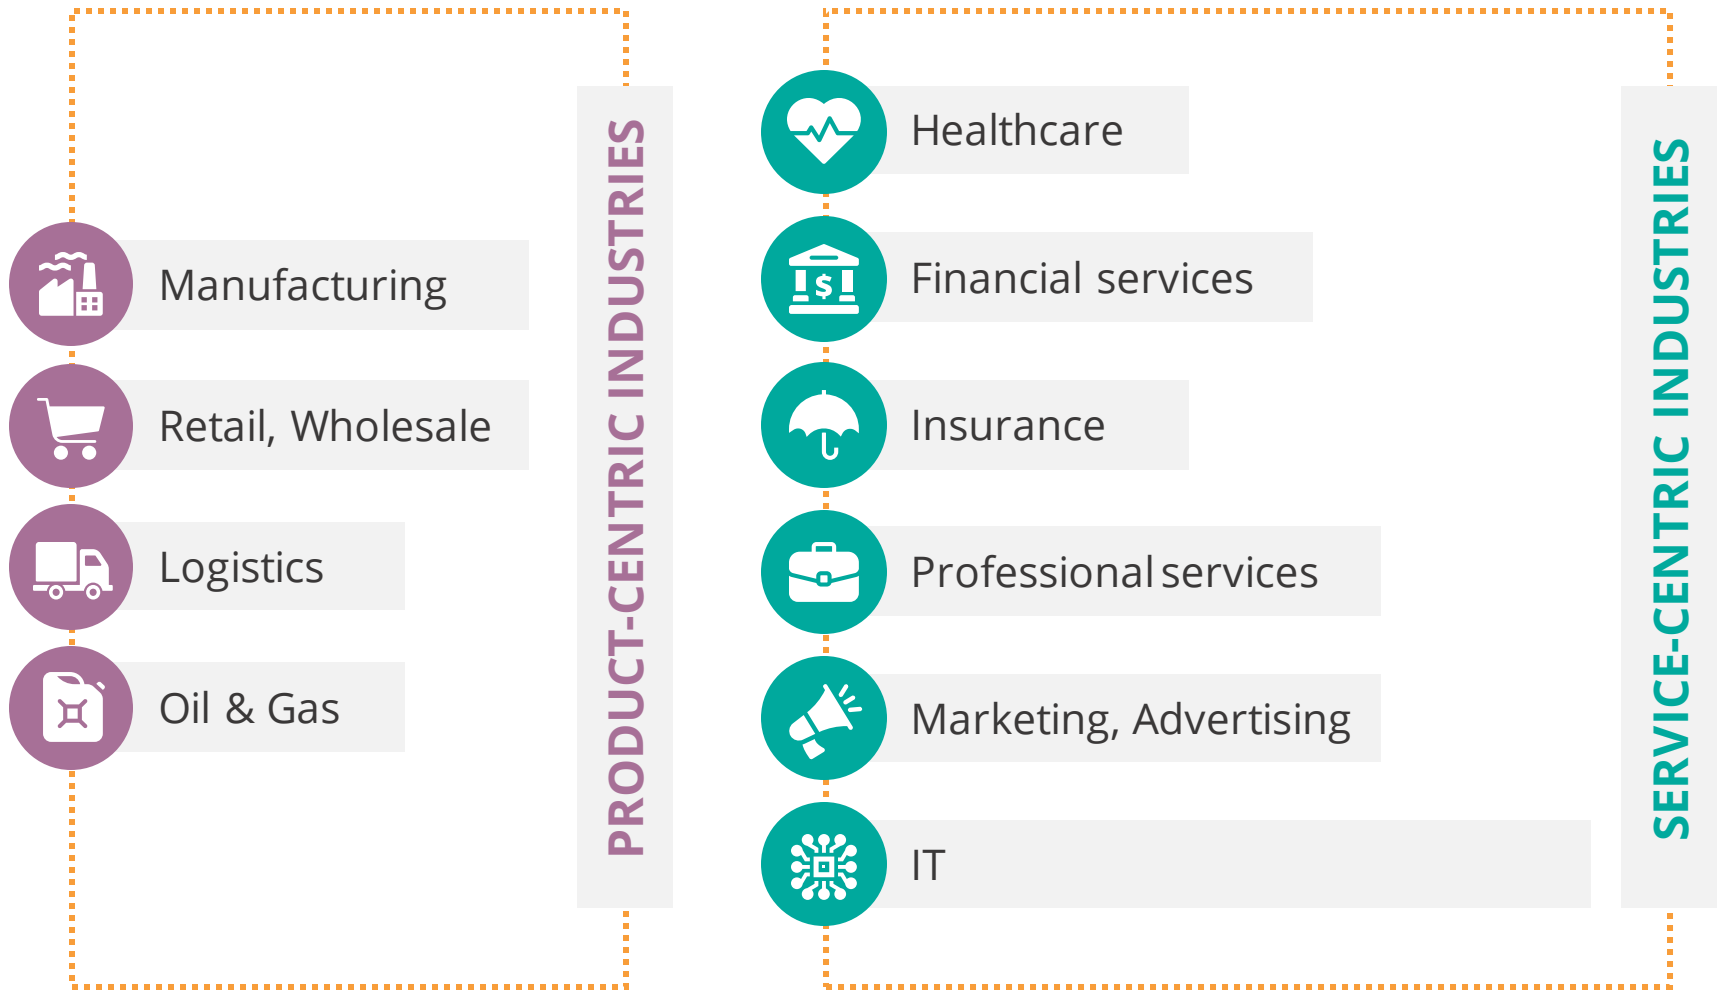

Digital service implementation

IT support

IT consulting

We **optimize IT operations** to increase their value for business.

- Business digitalization strategy (business-IT alignment)
- Refined IT operating model
- Roadmap on new solution/technology implementation

IT outsourcing

We cover **30-100% of your IT operations**:

- IT service planning, management, and evolution
- Managed IT services: infrastructure, application and help desk services, software development and QA

Business automation

We implement and launch **cost-effective and efficient IT solutions**:

- Business-critical applications
- Customer-facing applications
- Human capital management software
- Data analytics and BI

Across all digital services, we commit to top quality and lasting security of our solutions.

Service quality

Since 2008, we've been elaborating our quality assurance processes. Now, our quality management system is ISO 9001-certified.

ISO 9001

LL-C (Certification)

Information security

Applying 114 security controls required by ISO 27001, we safeguard the information assets that we access during the project.

ISO 27001

LL-C (Certification)

Our Services in Detail

Digital strategy consulting (for CEO)

Boosting business performance with creating digital channels to customers and digitizing business processes

IT strategy consulting (for CIO)

Bringing together a diversified IT landscape to make it work towards supporting current and new business processes and initiatives.

Solution consulting

Strategic guidance on prompt and reliable implementation of business-critical solutions.

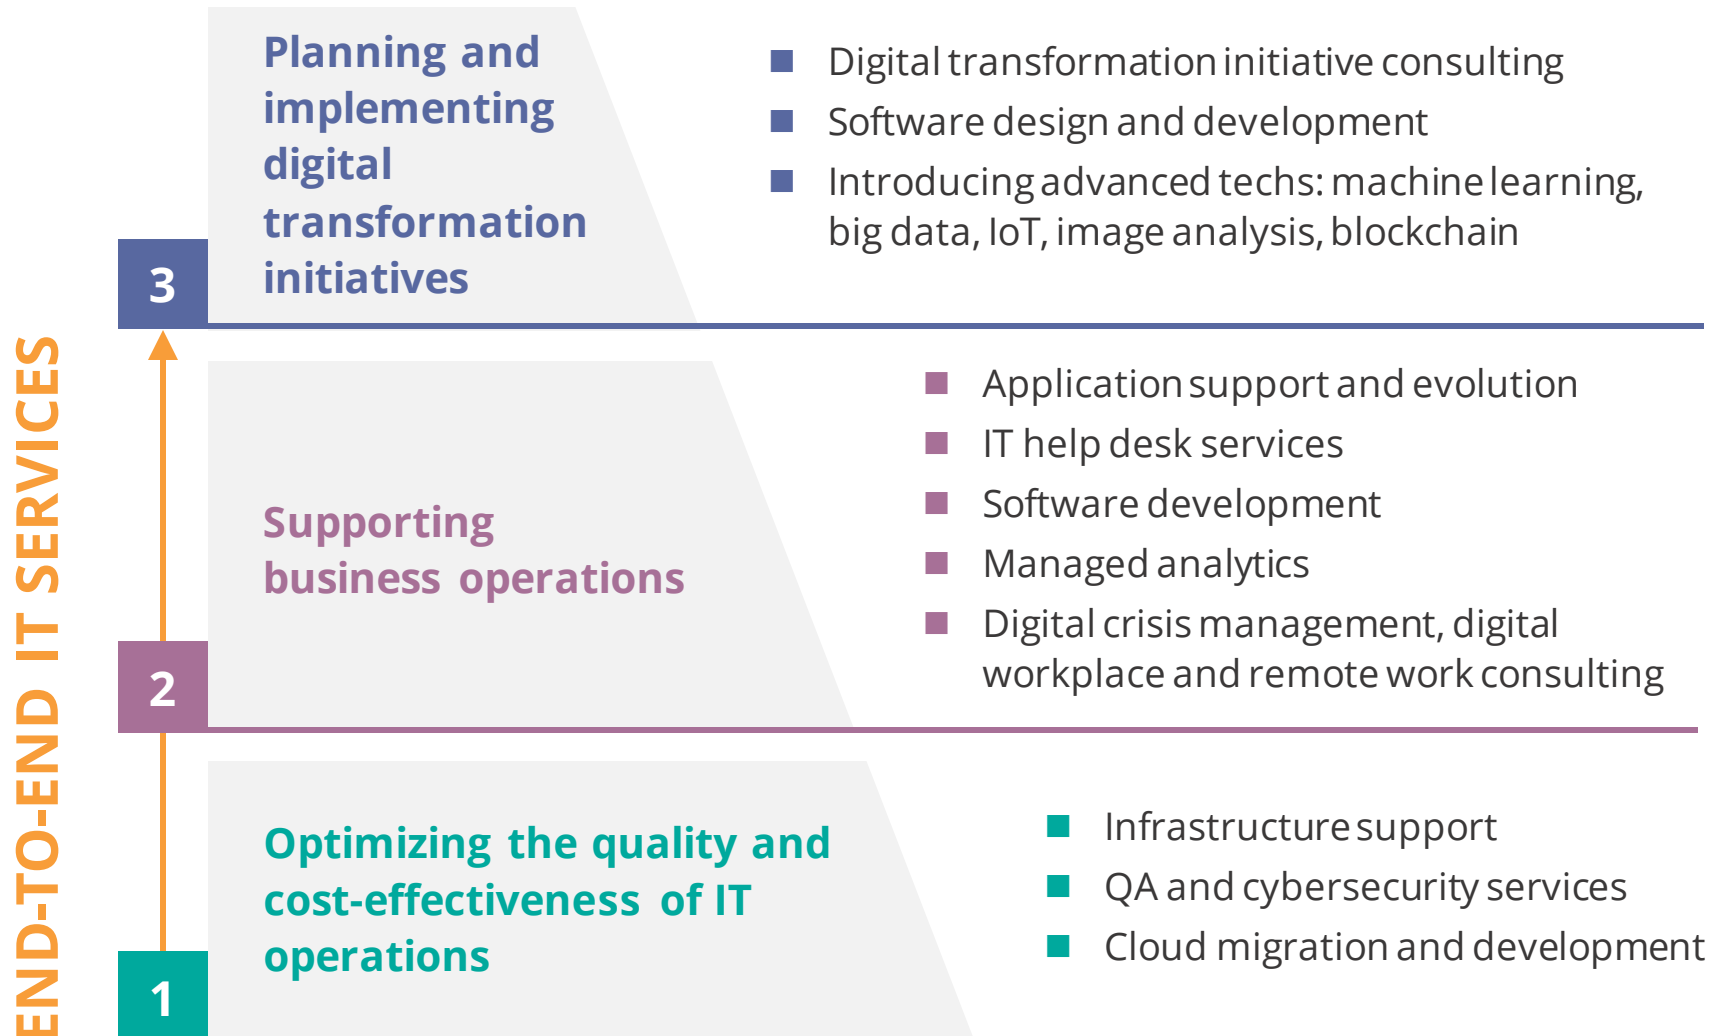

Digital transformation initiative consulting

Verification and planning of digital transformation initiatives tuned in with the business strategy.

Technology consulting

Help with adoption and steady evolution of the technology prominent for the business growth.

Effective collaboration

Structured approach to communication helps us design, build and maintain effective multilevel collaboration

On-time project delivery

We are flexible to scale up our team at any time in order to meet a hard deadline

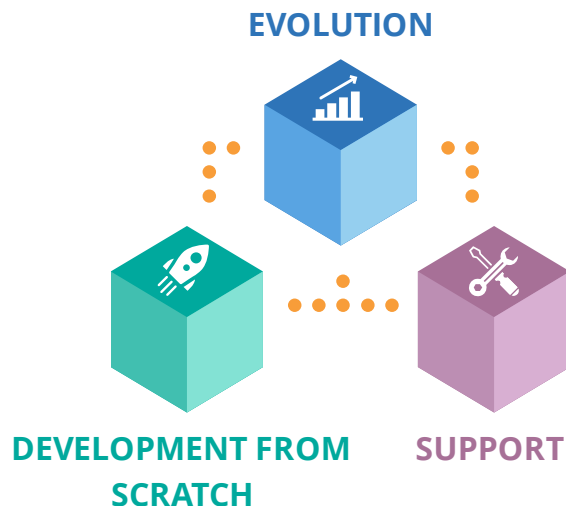

Self-management by objectives stated in SLA

We minimize management resources on a Customer's side while providing a high level of transparency and risk management

Delivering our software development outsourcing services, we support two project formats:

New applications

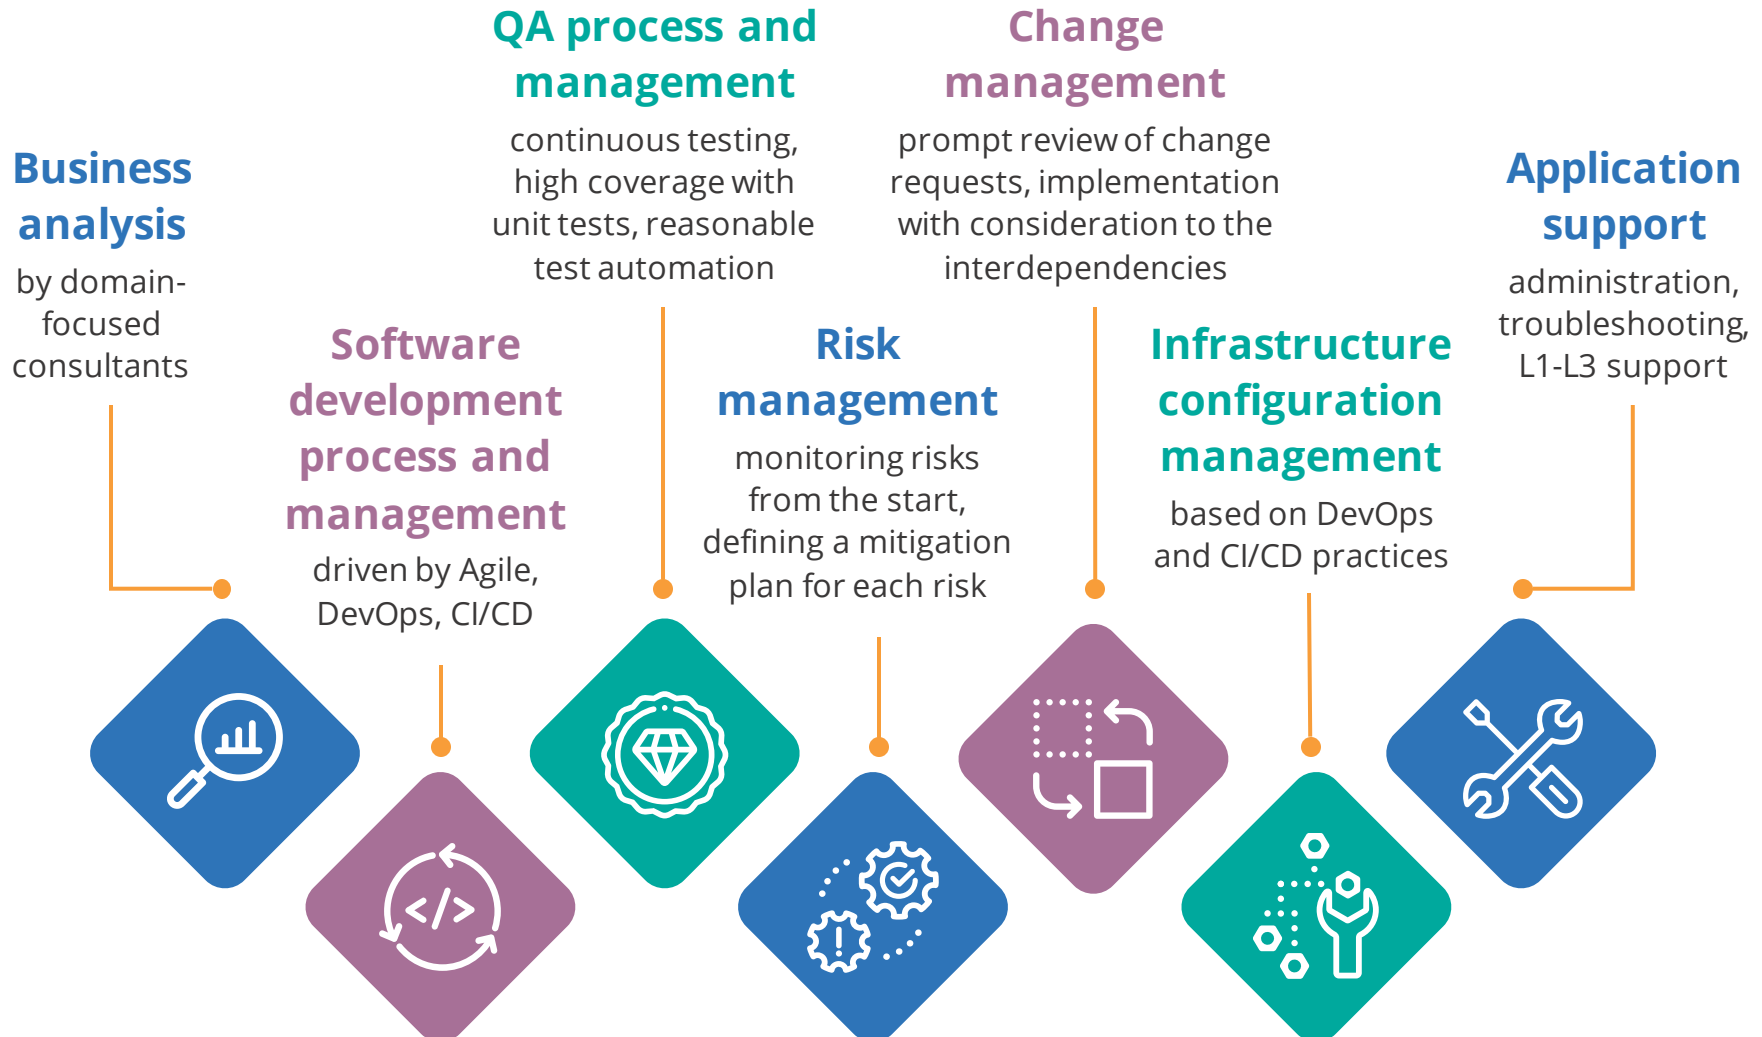

developed from scratch, put into production and evolved further

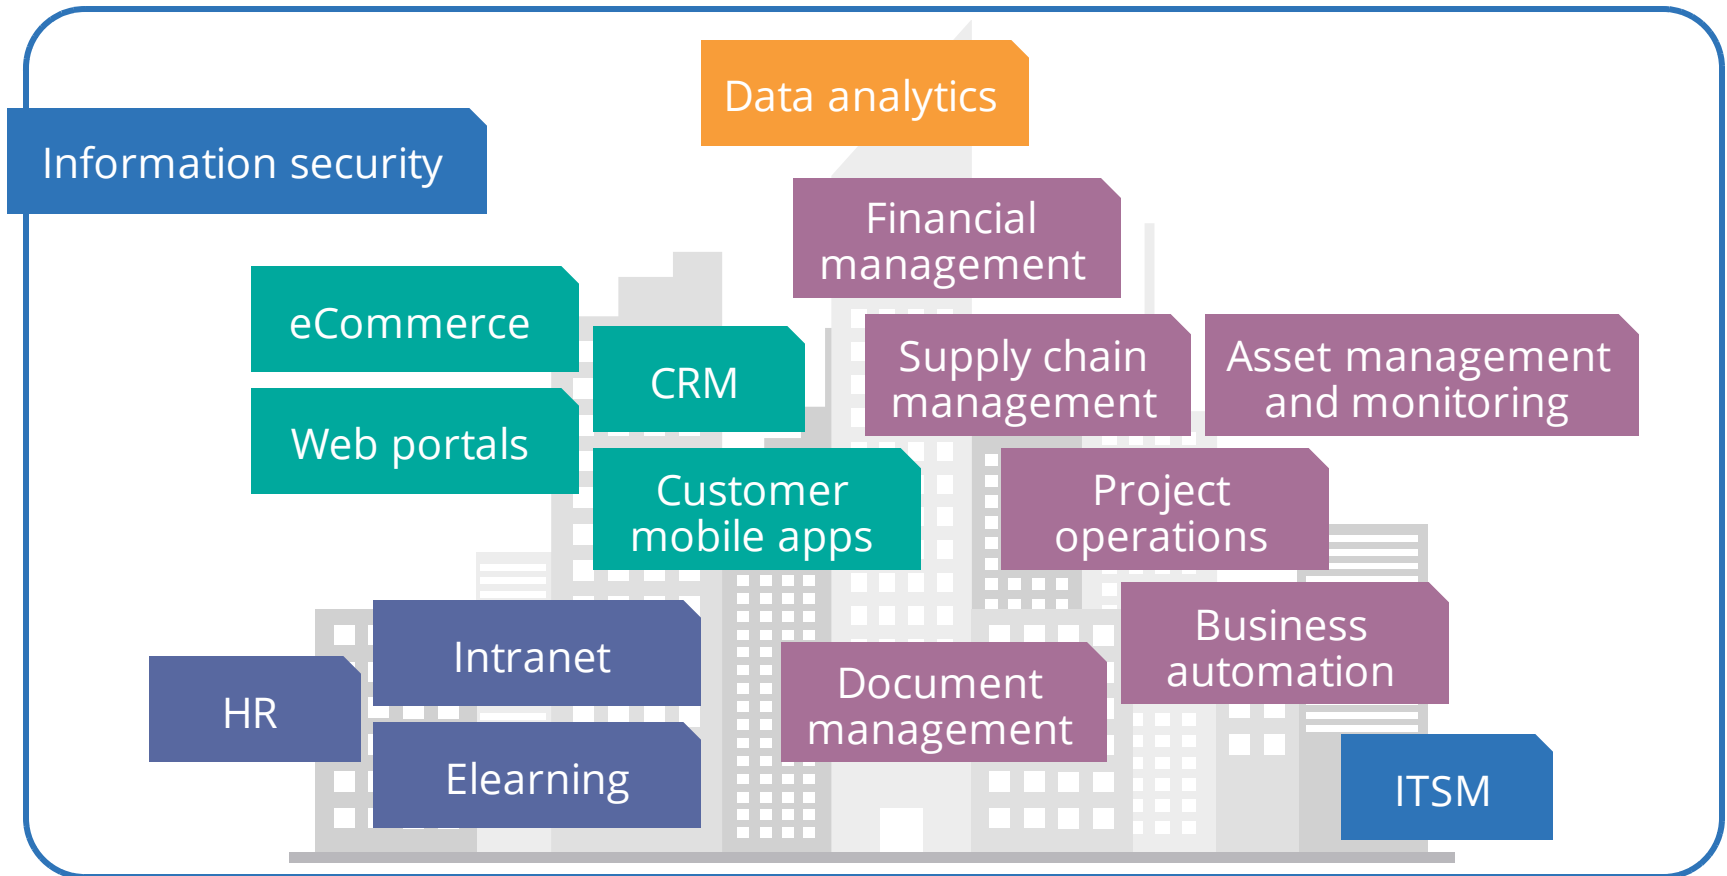

Existing software

that requires support and evolution

Cloud

Internet of Things

Computer vision

AR/VR

Big data

Blockchain

We apply all-round testing to ensure your software is well-functioning, secure and user-friendly.

BY AIMS & GOALS

- Functional testing
- Performance testing
- Usability testing
- Security testing
- Compatibility testing

BY AUTOMATION LEVEL

- Manual testing
- Automated testing

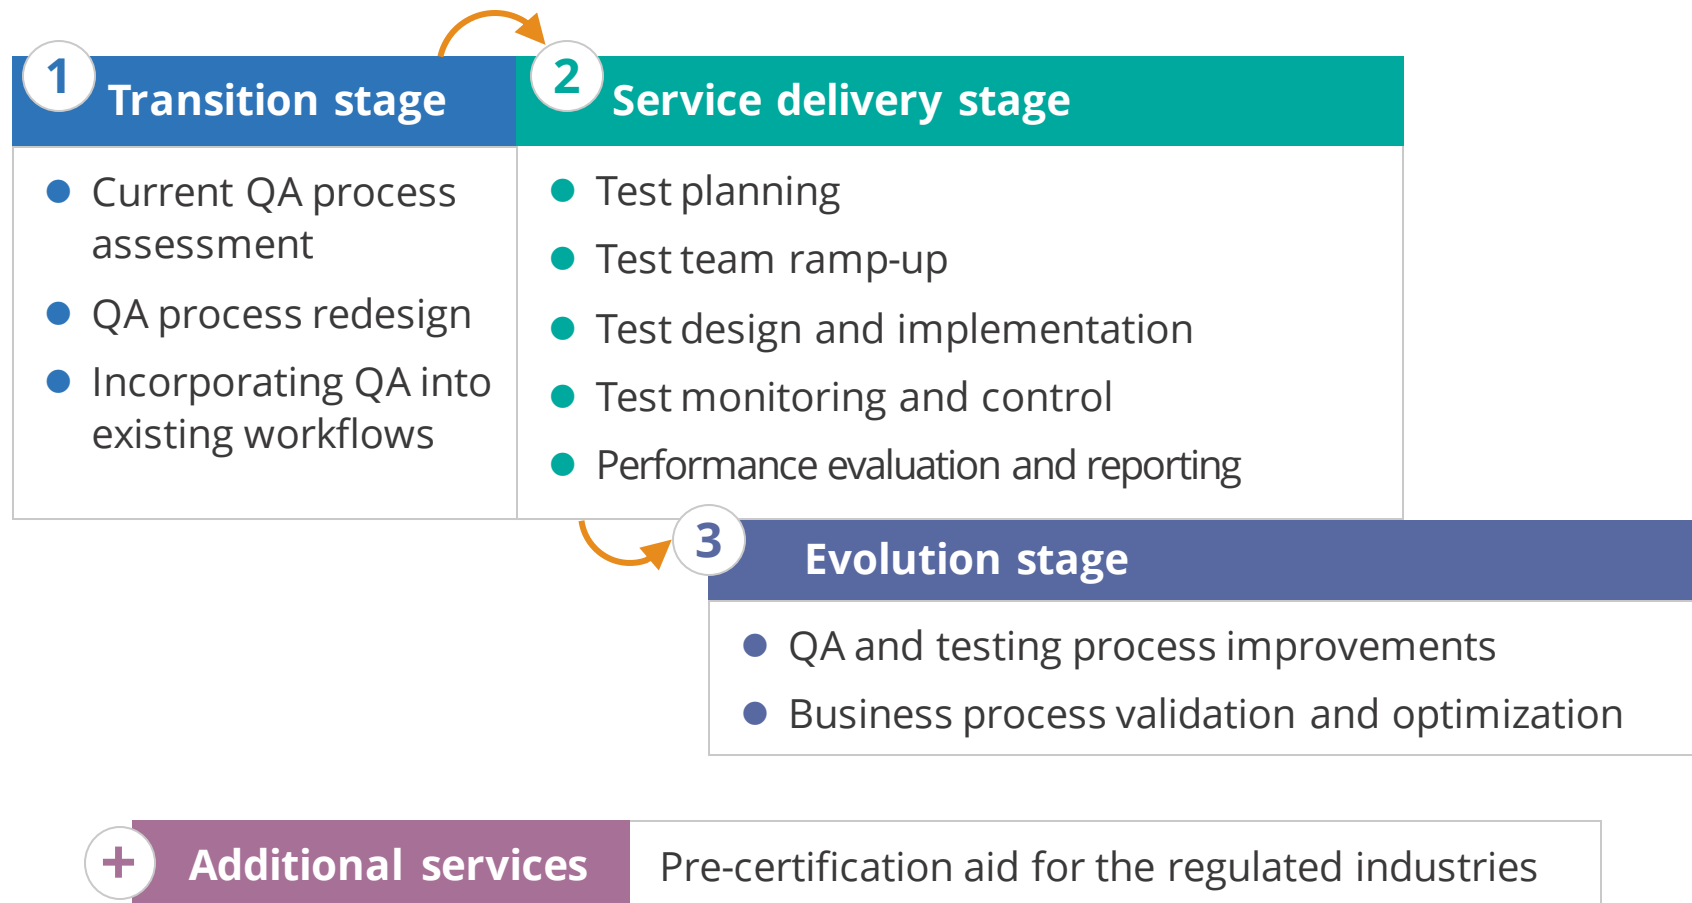

BY APPLICATION NATURE

- Web application testing
- Mobile application testing
- Desktop application testing
- Data analytics, including big data testing

BY FORMALIZATION LEVEL

- Formal testing
- Exploratory testing

Our flexible QA outsourcing offering generally covers the following stages:

Application modernization consulting

Evaluating app modernization feasibility. Choosing a modernization option, a cloud vendor, and cloud services. Delivering a high-level modernization roadmap.

Legacy system reengineering

Examining, analyzing and restructuring legacy software to improve its maintainability and quality, prepare for reuse, integration or functionality enhancements.

Migration to cloud

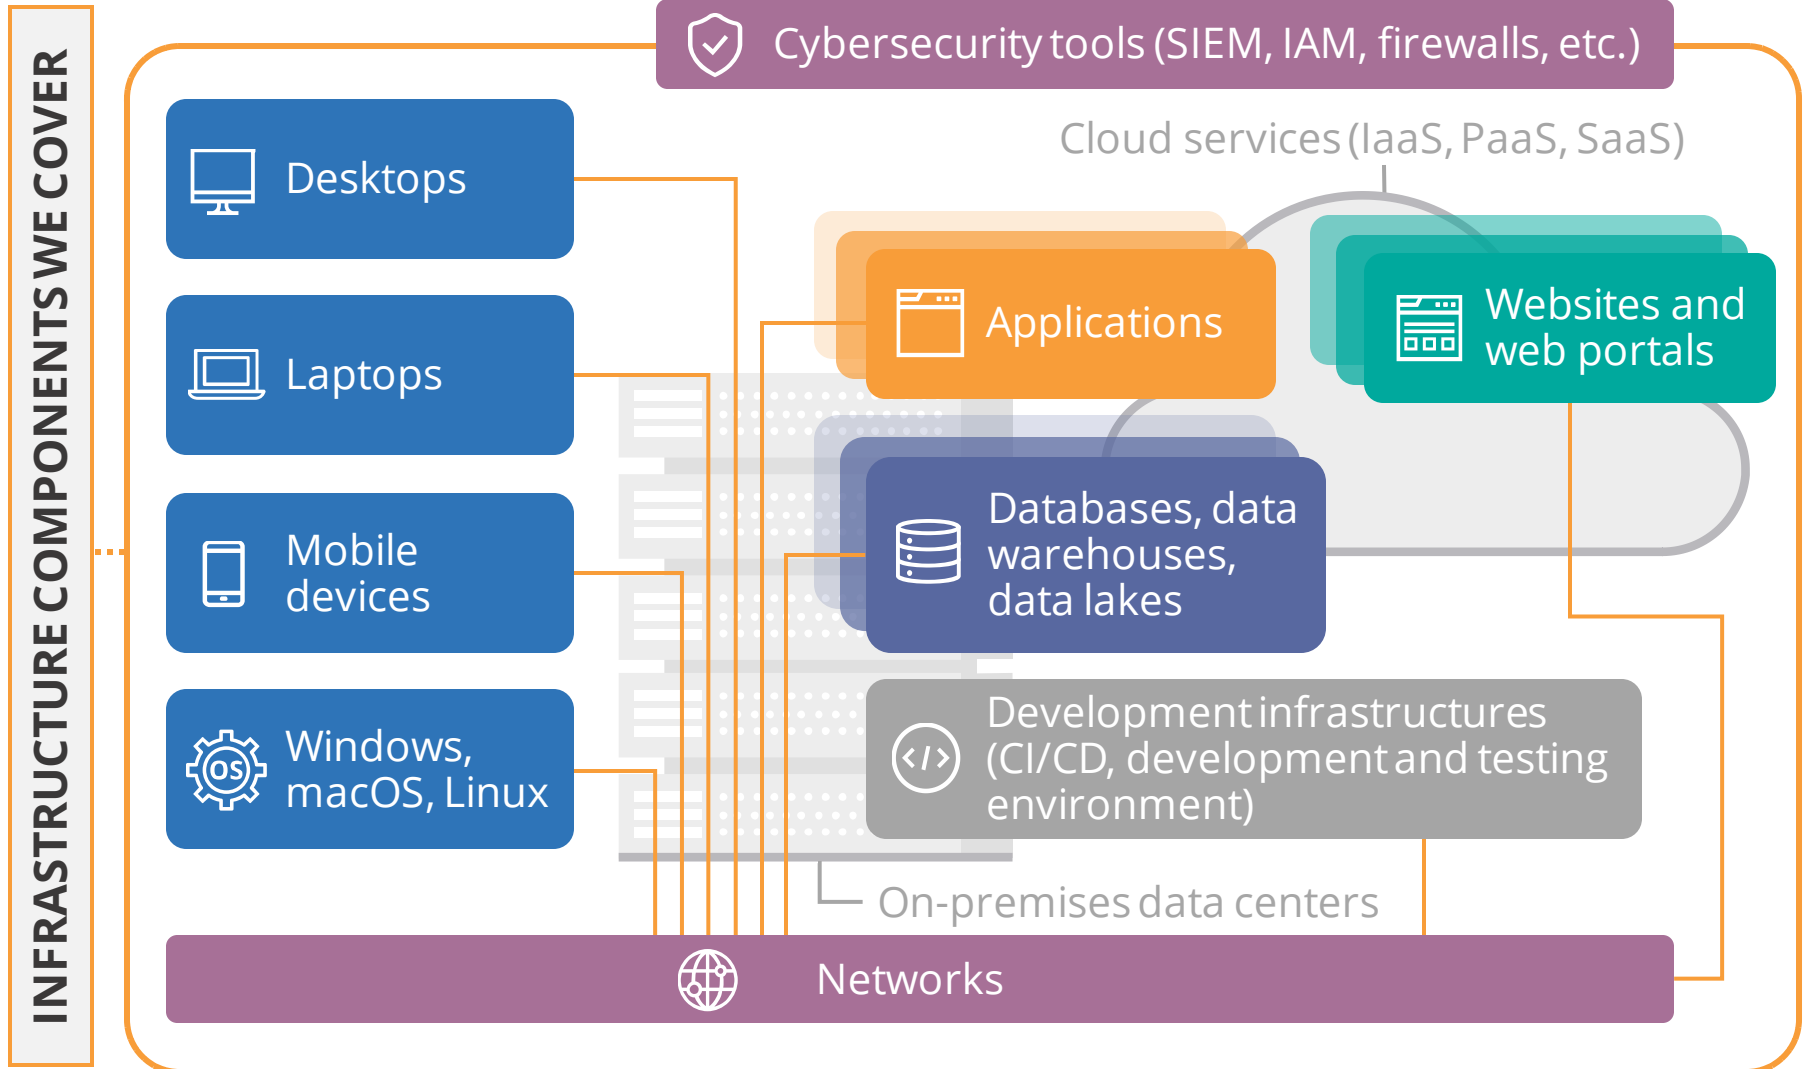

Moving on-premises applications and data to the cloud (from simple as-is re-hosting to re-platforming and re-architecting).

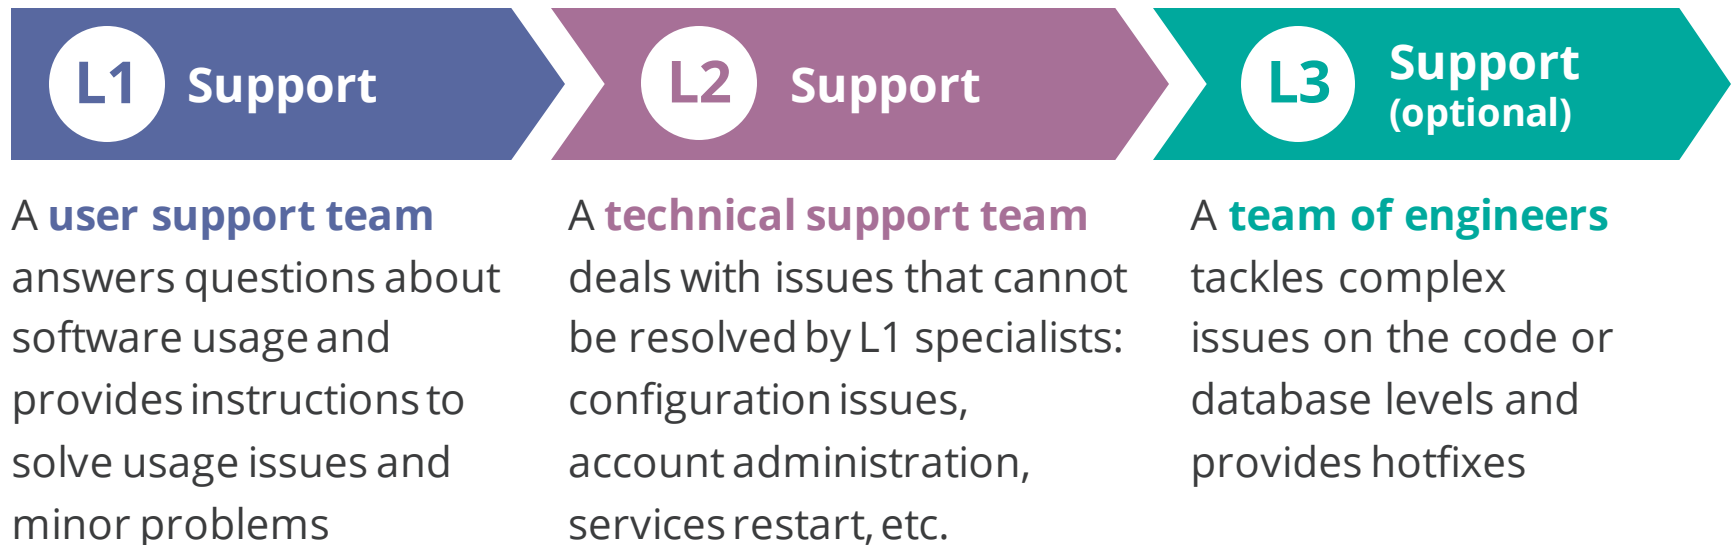

Legacy system recoding

Migrating legacy software to modern languages, frameworks and databases.

To reduce response time and optimize IT support costs, we segment the support team into levels according to the complexity of issues they are expected to handle:

Coverage options

24/7

12/5

12/7

8/5

- **Penetration testing**

to check the protection of the entire IT infrastructure or applications by finding and exploiting security vulnerabilities

- **Vulnerability assessment**

to detect and prioritize security weaknesses in the IT infrastructure and provide recommendations on their mitigation

- **Infrastructure security audit**

to find vulnerabilities in security policies and procedures, security monitoring tools, physical access control, etc.

- **Compliance testing**

to ensure the compliance with PCI DSS, HIPAA, and other regulatory standards

- **Security code review**

to identify encryption, buffer overflow, XSS vulnerabilities, and other security weaknesses possibly overlooked in the development phase

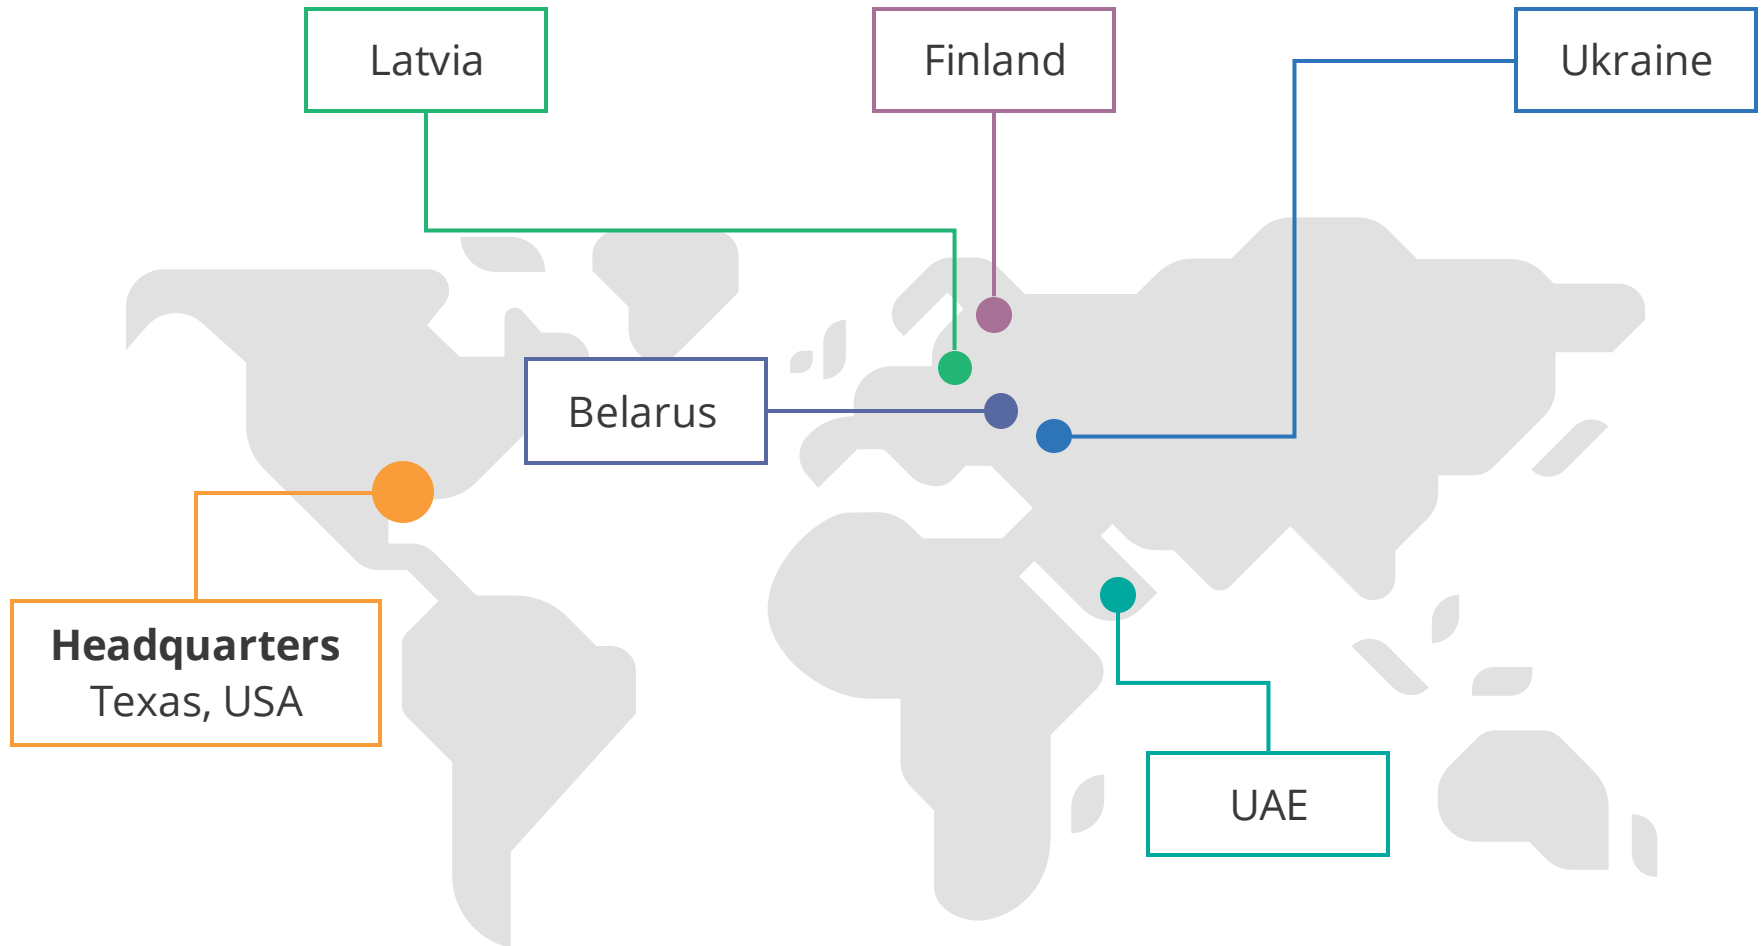

Our Technology Competencies

Front end	  	 React	 ANGULAR	 Vue.js	 METEOR
